(54) Title: ROLLING DISPLAY ARRANGEMENT FOR ELECTRONIC DEVICE

(57) Abstract: A rolling display arrangement (1) for an electronic device (2), the rolling display arrangement (1) comprising a display module (3), a shaft module (4), and at least one transmission module (5), the transmission module (5) being adapted for transferring rotational movement of the shaft module (4) and the transmission module (5) to linear movement of the display module (3). Such a rolling display arrangement allows the display module to slide linearly, and hence the size of the display to be changed without folding the display module.
