(54) Apparatus for recording a digital video signal

(57) A digital video tape recorder provides for the simultaneous recording of digital video signals and transmitting of those digital video signals either as analog or digital output signals, for example, for monitoring. In one mode, a recordable digital video signal is produced from a received digital video signal and recorded simultaneously with the conversion of the received dig-

ital video signal to an analog video signal which is supplied as an output. In another mode, an analog video signal is received and converted to a digital video signal for recording, and the converted digital video signal is simultaneously transmitted as an output video signal.
