 Abstract Title: **System, device and method for generating common actuatable options that initiate a plurality of actions**

(57) A system, device and method for generating common actuatable options that initiate a plurality of actions is provided. Interfaces are identified at the one or more display devices, each of the interfaces comprising a respective actuatable option which, when actuated, initiates a respective action, each respective actuatable option having a label. The interfaces are determined to be associated using one or more of: the labels of the respective actuatable options; and the respective actions. In response to determining that the interfaces are associated, a common actuatable option is generated at the one or more display devices, which, when actuated, initiates the respective actions.
