(54) Title of the Invention: **Absorbent article with pivotable wings**
Abstract Title: **Absorbent article with pivotable wings**

(57) An absorbent article can have a pair of pivotable wings. The pair of pivotable wings can be formed from a wing material which can be bonded to a backsheet layer of the absorbent article and each wing can be configured to pivot between a first wing configuration and a second wing configuration. The wing material can be provided with a wing pivot point and fold lines which can enable the pivoting between the first wing configuration and the second wing configuration.
