- with amended claims (Art. 19(1))

Date of publication of the amended claims: 14 March 2013

(84) Designated States (unless otherwise indicated, for every kind of regional protection available): ARIPO (BW, GH,

AMENDED CLAIMS
received by the International Bureau on 27 August 2012 (27.08.2012)

7. An eggplant shaped sleeping bag comprising:
an upper region with a first width for containing a
head and upper body portion of a user;
a lower region with a second width for containing a
5 lower body portion of the user, wherein the second width
of the lower region is wider than the first width of the
upper region; and
a middle region, located between the upper and
lower regions, the middle region with a third width,
10 wherein the third width of the middle region is narrower
than the first width of the upper region and the second
width of the lower region.

8. The sleeping bag of claim 7, further comprising an opening in the upper region.

5 9. The sleeping bag of claim 7, further comprising a fastener mechanism.

10 10. The sleeping bag of claim 9, wherein the fastener mechanism is selected from the group consisting of a zipper, a hook and loop closure, a plurality of buttons, and a plurality of snaps.

15 11. The sleeping bag of claim 9, wherein the fastener mechanism is located in a central region of a front side of the sleeping bag

20 12. The sleeping bag of claim 9, wherein the fastener mechanism extends generally an entire length of the central region of the front side of the sleeping bag

13. The sleeping bag of claim 9, wherein the fastener mechanism runs a partial length of the central region of the front side of the sleeping bag

5

14. The sleeping bag of claim 9, wherein the fastener mechanism is located along at least one outer edge of the sleeping bag.

15. A sleeping bag comprising:

5 a lower region having a first width, the lower region bulbous in shape and configured to allow for movement around a user's knees and feet when in use;

10 an upper region having a second width, the upper region narrower than the lower region, wherein the upper region and the lower region are configured to taper towards one another and meet in a gathered region with a third width, wherein the third width of the gathered region is narrower than the upper region.
