(54) Title: A DATA DELIVERY SYSTEM FOR REMOTELY COMMUNICATING WITH A PHYSICIAN'S OFFICE

(57) Abstract: A method of communicating with a physician's office (104) that includes a host computer (102) receiving, via the network interface (120), one or more data files (112) from a data delivery device (122) remotely located in a physician's office (104). The method further includes determining a set of data processing programs (114) to be utilized when processing the received data files (112), where the determination is made based on a subscription associated with that particular physician's office (104). The method also includes processing the received data files (112) utilizing at least a portion of the set of data processing programs (114), where the processing includes collecting or manipulating data files.
