(54) Title: AN EXERCISE PLATFORM

(57) Abstract: An exercise platform is provided, for use in physical and mental activated application setups. The exercise platform includes at least a bottom layer (12) with a number of wells (34) each adapted to accommodate a normally-open force responsive switch and a tile with indicia, a top layer (4) which is fastened to the bottom layer (12) and which holds said switches and tiles (5) in place. The top layer (4) contains openings through which a user may activate the force responsive switches, said openings providing a height level difference between a tile's (5) visible area and the top layer (4), the openings defining correct positions for a user to activate the force responsive switches.

\* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
