(54) Title: STRETCHABLE WRISTBAND WITH RFID CHIP

FIG. 1

(57) Abstract: The present invention is an article of apparel, such as a wristband, that includes an radio frequency identification (RFID) device. The wristband is at least partially formed from an elastomeric material that allows the wristband to stretch while being drawn over the user's hand. The RFID device is positioned on or within the wristband. Once affixed, the RFID device remains an integral part of the wristband. The wristband may be used in any available RFID application, including a contactless payment system.
