- **DARIMONT-NICOLAU, Christian**
  1012 LAUSANNE (CH)
- **EGLI, Léonie**
  1807 Blonay (CH)
- **RYTZ, Andreas**
  1084 CARROUGE (CH)

(74) Representative: **Kamibayashi, Lynne**
Société des Produits Nestlé S.A.
Avenue Nestlé 55
1800 Vevey (CH)

(54) USE OF WHEY PROTEIN MICELLES FOR CONTROLLING POSTPRANDIAL GLUCOSE RESPONSE

(57) A method for reducing postprandial glucose from a meal includes orally administering to an individual a composition containing whey protein micelles (WPM) and then subsequently orally administering the meal to the individual after the oral administration of the composition containing the WPM and within about one hour of the oral administration of the composition containing the WPM. For example, the meal can be administered about thirty minutes after the administration of the composition containing the WPM. The postprandial glucose is reduced relative to postprandial glucose from administering a corresponding composition comprising whey protein isolate.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO. EP 24 15 6914

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
