(74) Representative: **Bird & Bird LLP - Hamburg**
Am Sandtorkai 50
20457 Hamburg (DE)

(54) **SOLAR MODULE COMPRISING INTERCHANGEABLE SINGULATED STRIPS**

(57) A photovoltaic workpiece featuring micro-chamfers at its corners, bears a plurality of parallel thin conductive fingers extending between opposite edges. A first bus bar is formed overlapping the plurality of thin conductive fingers proximate to the first edge, with ends of the first bus bar not overlapping the micro-chamfers of the first edge. A second bus bar is formed overlapping the plurality of thin conductive fingers proximate to the second edge, with ends of the second bus bar not over-

lapping the micro-chamfers of the second edge. Additional front side bus bars are formed overlapping the plurality of thin conductive fingers at regular intervals in the interior of the workpiece. With bus bars thus patterned, the workpiece is singulated into: two edge strips featuring micro-chamfers and the respective first and second front side bus bars; and interior strip(s) that each include one of the respective additional front side bus bars.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 24 16 0561

5 This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
