(54) Title: A METHOD ENABLING LAW ENFORCEMENTS, REGULATIONS, SOCIAL, ECONOMIC, AND FINANCIAL TRANSACTIONS AND VERIFICATIONS ON THE BLOCKCHAIN

(57) Abstract: In this invention, any information (instructions, events, happenings, invitations, societal interactions, histories, relationships, associations, memberships, affiliations, hierarchies, rights, privileges, requests, ownerships, obligations, liabilities, contracts, promises, identities, attributes, statuses, endorsements, qualifications, certifications, credentials, etc.) worth recording for later reference, transaction, verification, calculation, determination, and execution can be recorded into the blockchain system via electronic communications sent by law enforcement agencies, regulators, and other entities or individuals to the blockchain operators and guardians (nodes, miners, etc.). The blockchain system can then decide whether a transaction should be approved, whether to unfreeze a frozen account, how a smart contract should proceed and settle, etc. External systems can also query the blockchain system for facts, verifications, guidance, etc. This invention enables law enforcements, regulations, as well as social, economic, and financial transactions and verifications on the blockchain, and works in both permissionless and permissioned blockchain systems.
