(54) Title: GESTURES FOR TOUCH SENSITIVE INPUT DEVICES

(57) Abstract: Methods and systems for processing touch inputs are disclosed. The invention in one respect includes reading data from a multipoint sensing device such as a multipoint touch screen where the data pertains to touch input with respect to the multipoint sensing device, and identifying at least one multipoint gesture based on the data from the multipoint sensing device.

International application No. PCT/US2005/025657

INTERNATIONAL SEARCH REPORT

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
1. X As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-14, 29-37, 47-65, 83, 84 (as far as dependent on claims 1,11,29,32,51,53,54,62,64), 85 (as far as dependent on claims 1,11,29,32,51,53,54,62,64)

Input method for multi-point gestures (dynamic input)

2. claims: 15-28, 41-46, 79-82, 84 (as far as dependent on claims 15 or 41), 85 (as far as dependent on claims 15 or 41)

Input method for multiple touches (static input)

3. claims: 32-37, 39-40, 84 (as far as dependent on claim 32), 85 (as far as dependent on claim 32)

Input method for unique identifiers (static input)

4. claims: 32-38, 73-78, 84 (as far as dependent on claims 32 or 38), 85 (as far as dependent on claims 32 or 38)

Input Method for single-point gestures (dynamic input)

5. claims: 66-72

Method of temporarily enlarging a GUI image
